Summary

I've recently completed my MCA and have built a solid foundation in software development. I'm really passionate about frontend development and have hands–on experience with HTML, CSS, JavaScript, and React.js. During my studies, I worked on projects like a School Management System and a Library Management System, where I applied Object–Oriented Programming concepts. I'm now looking to start my career as a Frontend Developer, where I can use my React skills to create user–friendly and responsive interfaces. I also have a good understanding of Java, which adds to my overall programming knowledge.

Projects

SCHOOL MANAGEMENT SYSTEM
Dehradun, india
01/2024 – 06/2024

. Managed school activities and user interactions through an administrative interface.

. Developed a School Management System to manage school activities.
